WILLIAMS Collection

Parallel lines and crisp angles give the Williams Collection its contemporary flair. Constructed from solid wood, the Williams Collection adds modern appeal while retaining the warmth of wood furniture.

Streamlined and functional, the collection complements, rather than dominates, its environment. Williams tables feature flush end apron rails, end and center stretchers and are supported by solid wood bases and straight legs.

The Williams Collection includes study tables, occasional tables, carrels, table carrels with divider options and benches.
