Ergonomic Home Intros Verte Chair (10/6/2004)

Imagine if there was an ergonomic chair with a backbone/spine Designed to support, move and work with your backbone/spine ... Imagine sitting in an ergonomic computer chair that molds itself to your backbone-spine's unique shape, fitting and holding you perfectly. Imagine no more Your VERTE' advanced ergonomic computer chair is at ErgonomicHome.com <http://ergonomichome.com/ercoch.html>.

The award winning design of the VERTE' ergonomic computer chair adjusts in three dimensions. Horizontally in-out 3.5 inches. It also flexes to the left and to the right. Just like your backbone/spine does. It has been in development for over 10 years by a team of over 100 engineers, designers, and doctors. As a true ergonomic chair and orthopedic device, the VERTE helps to ease pain and improves your posture, actually teaching your spine to relax while seated.

Standard in soft black Italian leather. Nature's most comfortable

upholstery. The VERTE' chair won the prestigious ADEX Platinum award in 2003 for design excellence. Each VERTE' chair includes eleven adjustable zones of back support, which automatically adjusts to an individual's size, shape, and posture of their upper, middle, and lower back. It can be locked into position most comfortable for you or be quickly re-adjusted for another person. Over time, "muscle memory" takes over and your posture improves naturally while increasing circulation in your back.

VERTE' reduces the pressure points on your spine. Say for instance you had surgery on your L5 vertebra but still had pain from sitting in your chair. You could adjust the VERTE' chair in the L5 vertebra to compensate for this. The active and passive micro-adjustability of the VERTE' ergonomic computer chair offers you superior ergonomic performance for all day - everyday comfort.

Extra thick foam back & seat provides exceptional comfort for people who spend long hours sitting at To save our customer's money, www.ErgonomicHome.com has free shipping to the lower 48 contiguous states and if shipped outside of Texas there is no sales tax saving you and additional 8.25% more.

SPECIAL DEALS!

Adobe Presents The Creative Suite® Tour

Discover full, new versions of your favorite design applications tightly integrated in Adobe Creative Suite. Attend this free seminar to see powerful new tools, the innovative Version Cue™ file-management feature, and the smoothest Portable Document Format (PDF) workflow yet.

Mireth Special for MacDirectory readers:

iVCD allows you to easily make Video CDs and Super Video CDs on Mac OS X from iMovie, Quicktime or AVI movie files. iVCD can be used to author Video CDs (MPEG-1) or Super Video CDs (MPEG-2) and supports both NTSC and PAL output formats. With iVCD, each movie you make is stored in a separate project folder, so you can easily make additional copies.

MacVCD X is the easy-to-use VCD, SVCD and Quicktime movie player with auto play & eject, full screen display, small screen display (floating or regular window), 2nd screen display, auto track chaining, moving saving & editing, and advanced movie controls.

Timbuktu Free Evaluation Software

You can now receive access to an evaluation download version of Timbuktu Pro for Macintosh for free. Timbuktu Pro for Mac OS allows you to operate distant computers as if you were sitting in front of them, transfer files or folders quickly and easily, and communicate by instant message, text chat, or voice intercom.

MacDirectory Survey Of The Week

The new 17" PowerBook is here! Which do you prefer, the classic Titanium model, or the new anodized aluminum model?

- 1. Nothing beats the TiBook, you'll have to pry it from my hands!
- 2. The TiBook's paint chipping was bad, I like the new model.
- 3. The new model is great, but I was expecting more enhancements.
- 4. None of the above.
