

EZ Saddle Fit Tool by Horse Saddle Shop Experts

EZ INSTRUCTIONS

1. Adjust the EZ Saddle Fit Tool 2 ways to best fit your horse's shoulders.

As a starting point...

for a narrow horse, start with the width at D and adjust the angle to fit.

for a wide horse, start with the width at C and adjust the angle to fit.

for a very wide horse, start with the width at A/B and adjust the angle to fit.

2. Place the EZ Saddle Fit Tool on your horse where the fork (front of the saddle) would rest. The blue line on the diagram below shows the proper placement about an inch behind the scapula.

NOTE: The best fit should have no gaps between the shoulders and the tool. This tool is not designed to measure with clearance so focus on getting the best contact.

3. Once you find which setting/s best fit your horse's shoulders you can either call our toll free number 1-866-880-2121 or email a saddle expert at support@horsesaddleshop.com and give us the code/s. Also let us know any specifics about what you're looking for in a saddle (saddle type, seat size, price range etc) We will take that information and give you a list of saddles that match your needs.

In the pictures below, the center image (2E) is the best fit.
