## About

A fast surging company, on a leg for 10 years now. And still competing with the big guys to prove that they could be massive, become a threat to this expanding industry. Continuously scoring against the malign economic occurrence, Marathon® Professional, a company that is far beyond the rest, strategically placing itself into the bar where others struggle to reach. With the right perspective, some research and incessant product development, Marathon® will achieve to get into the mainstream in the years to come.

***“The key to this company is to listen to what the consumer wants with an agreeable pricing, quality and constant advancement of our products.”***

## An Ideal Business Partner

Marathon® does not only secure your gears with cases, but also secures a dealer from profit and margin. We welcome dealers to sell our products. Giving an adequate amount of margin and a reasonable value of percentage for profit makes us a good business partner.

To date, there are about 300+ SKU's in Marathon's full-line of products. And what excites us most, is the emergence of new technology each day such as computer and video based DJ gears that challenges Marathon's team to research and innovate new products and become unstoppable in the years to come

## 2002

was the year that brought the name MARATHON® to the music industry. It was when two industry veterans, had an idea to sip a bit (just to see if it works) of some fortune to the music scene. And delightedly it worked out for them.

It was when they started to get involved in the music industry for the past fifteen-years running a specialty DJ store in Los Angeles area since 1988. Then five-years later they decided to make their own brand, hence the birth of Marathon® Professional.

What they thought at first was to bring in a 15" dual speaker, and from then on people kept asking for more models. And they listened. So they made a single 15" speaker and a line of amplifiers. Until dealers were approaching to host Marathon® products. The key to this company was to listen to what the consumer wants with an agreeable pricing, quality and constant advancement of Marathon® products. That is why non-stop research is intended for such a young company as Marathon® to meet up with the big guys.

## 2006

was the year when MARATHON® introduced the Professional Audio Line, bringing CD players, Mixers & Amplifiers. these products became the flag ship of the Professional Audio Line

Since then more Marathon® products started to emerge including a line of professional audio products such as CD players, mixers, amplifiers, and speakers. But they didn't stop there, they started to build storage cases that is known for as the Flight Road Cases™.

As far as a music professional's concern, it would be a huge amount of comfort to fit all in the gears in one strategically made case. With all protection and DJ friendly case features. But with some case-making-competitors, Marathon® is different, in terms of design and product-precise compatibility, in terms of innovative designs, we have made a patent-pending laptop shelf that is great and would ease a DJ's anxiety as to where they would place their laptop. With more products starting to turn up, especially for the computer-based DJ's, Marathon's team are designing "ready-made" cases for a specific brand product — making it more personalized.

## 2009

passed but the products that came stayed. The Black Series Cases were launched with wide assortments to choose from; Large, medium & small format cd player coffins that fits 10, 12 & 19 inches of mixers were added to the line up including individual mixer & cd player cases. Cases for computer media & midi controller were also added especially for manufacturers that develops media controllers every now & then.

## 2011

2010 was the year that MARATHON® brought exciting new products, the all new KVC active series speakers and subwoofers were so competitive that the industry considers MARATHON® as one of the leading company in the DJ & Pro Audio industry, redesigned and much improved sound quality. We also added square truss straight segments from 1.64 ft to 9.84 to choose from; accesories were also added.

## 2012

we have seen now how MARATHON® Professional become one of the major player in the Pro Audio, Music and DJ industry in 2011. This was mainly because of the company's wide customers & distributors, nationally & internationally

as we start the year 2012, MARATHON® Professional will continue to dedicate itself in improving its product categories & will constantly look for innovative ways to cater to the needs of the Pro Audio, Music and DJ Industry.
