

**CHECKLIST**

# Initial Burn: Wood-Burning Fireplace Installations

- Does the fireplace draw smoke up the flue immediately or shortly after ignition?
  
- After the fire has burned in for awhile, does smoke continue to draw up the chimney as designed?
  
- Can any smoke leaks be observed from the front of the fireplace or from chimney pipe joints?
  
- If equipped with a thermostatic fan, does it operate as it should?
  
- If equipped with an outside air kit, can air be felt being pulled into the fireplace?
  
- If equipped with a gas log lighter, does it ignite and operate as designed?
  
- Does the damper work as designed?
  
- Do screens and/or doors operate as they should?
